Bamboo Artisans
Conclave 2019
Sustainable Products for Green India
18-19 September 2019, Dumka, Jharkhand

Organized by:
Mukhyamantri Laghu Evam Kutir Udyam Vikas Board
Department of Industries, Govt. of Jharkhand
The Government of Jharkhand is organizing a two days event “Bamboo Artisans Conclave 2019” on 18th and 19th September 2019 at Dumka, Jharkhand.

The event coincides with the “World Bamboo Day 2019” on 18th September.

The initiative is being taken for channelizing opportunities in Bamboo Sector ranging from cultivation to value-addition and utilizing bamboo as an alternative energy source.

The State Government is committed to establish Jharkhand as one of the prime destinations for Bamboo based products, locally and globally.

The event is set to throw light on all vital aspects of bamboo development – from scientific plantation and farming, through competitive value-addition with the help of state-of-art equipment and machines, to exploring sustainable market avenues.

The event would provide an opportunity to the tribal communities to market their bamboo based products.

The event would also provide an opportunity to prospective investors to better understand the potential of Jharkhand in bamboo sector.

---

**Overview**

Potential in Jharkhand

- In most of the hilly States of the country, bamboo is used as building material/construction material, besides, having a potential niche market in other countries as well with various traditional and an ever-increasing range of contemporary uses/applications in industries like construction, furniture, textile, food, energy production, herbal medicine etc. This is especially important from the potential of bamboo based livelihoods and employment for rejuvenating the rural economy and doubling of farmers’ income.

- Bamboo is naturally found in 4470 sq.km. in the state.

- 98% of the volume of bamboo species in the state is of the Dendrocalamus strictus. Other species of Bamboo in Jharkhand are Bambusa tulda, Bambusa nutans and Bambusa balcooa.

- As per ISF reports 2017, the total numbers of green clumps is 515 million and dry clumps are 114 million.

- The quantity of total estimated green weight of bamboo is 2520 million tonnes out of which the estimated healthy green weight is 1901 million tonnes and dry weight is 619 million tonnes.
